

The latest LED products from **hansen!**

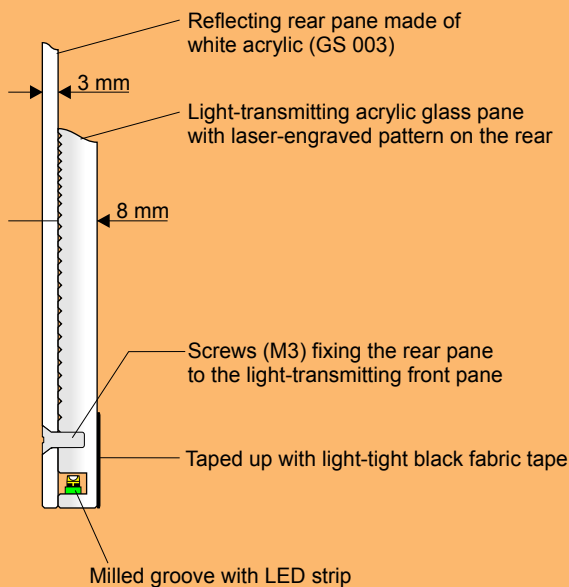

Luminous Panels - the ideal solution for backlighting acrylic panels or digital prints.

Maximum size = 2000 x 900mm
(though we can quote on larger sizes on request.)

- Extremely flat - overall depth 11mm, or double sided 19mm
- Low energy consumption
- Slim design allows the panels to be built into stylish frames, or display cabinets
- Bright - the latest high efficiency LEDs mean that these panels can be used as a diffused light source - in display cabinets for example
- Coloured or RGB lighting is simple!

Cross-sectional view of the panel

Saving energy with luminous panels - typical power consumption:

DIN Format...	Power (W)
A4	6.3
A3	8.9
A2	12.5
A1	24.9
A0	34.7
