104N Warmtone White 2800K	**3082K, CRI 71, 1070 lm/m**
110 Special 010 White 6800K	**7693K, CRI 74, 935 lm/m**
Options	**26 (see ordering)**

Features

- Colours: 101 White 6500K, 102 White 4500K, 103 White 3500K, 104N White 2800K, 110 White 6800K
- 104N White 2800K in 20mm is also available in 1m lengths
- Diameters: 8mm to 20mm (availability varies by colour)

Good to know

- Standard tubes are 1.5m long in lead-free Eurolite glass, unless the options say otherwise.
- If you need tube to finish a job, ask us whether we have the same batch number.
- Don't mix glass of similar colour names from different manufacturers.

White 6800K (110) / 12mm	**7E110-2**

Light data from Glostertube test sheets (15mm lead glass at 50mA, or 20mm lead-free glass for triphosphor whites); results vary with diameter, current and gas. Ask for the same batch number to finish a job, and do not mix glass of similar colour names from different manufacturers. Data from the manufacturer, the Sign-Tec catalogue (Feb 2025) and our product records. Figures are typical and the manufacturer may change specifications. Stock varies: check sign-tec.co.uk or call us.
